

Firearms Shipping Instructions

If you are sending us items to be engraved, Include your Name, Address, Phone Number, and Email. Include what you want engraved and where on the item. If you have a trust please include the exact name or a copy of your trust information.

We will call you for payment after the item is done. We except most credit cards. If you want to include a check or money order.

We ship USPS and insured the items so include this in the payment. The ATF requires all short barrel rifles to be engraved with the manufacturers name, city, and state.

Please send an email with the rifle model and desired engraving location. Also include a sample of the text to be engraved in your initial email. All rifle receivers sent in for engraving should be stripped of the easy stuff, mostly to make shipping less expensive. We can do the engraving whether the receiver is stripped or not.

Please print, fill out and send with your firearm
